# Delivery Workflow

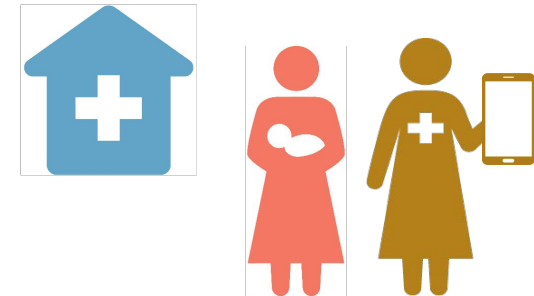

A currently registered pregnant person has reached a gestational age of 42 weeks and has not had a miscarriage or a delivery reported.

Triggers: ➡️

A [Delivery Task](#) requesting that the CHW check in on the woman to see whether she has delivered.

Completed When: ➡️

CHW submits a [Delivery Form](#), confirming the pregnancy outcomes. Profiles are created for each baby that is alive. This "ends" the pregnancy workflow.

A CHW submits a [Delivery Form](#) that contains a danger sign for mom or baby, or reports that either mom or baby are "alive and unwell."

Triggers: ➡️

A [Danger Sign Follow-Up Task](#) appears immediately and is due 3 days later. Persists for 7 days after due date.

Completed When: ➡️

The CHW calls or visits woman to confirm that she attended and submits a Danger Sign Follow-Up Form. If this is not received, another [Danger Sign Follow-Up Task](#) is triggered.

If the CHW notices danger signs at any time, then she submits a Danger Sign Form and immediately refers the patient to the facility.

Triggers: ➡️

A [Danger Sign Follow-Up Task](#) will appear immediately and is due 3 days later. Tasks persists for 7 days after due date.

Completed When: ➡️

CHW submits Danger Sign Follow-Up Form, verifying that she called or visited the woman to confirm that she attended the facility. If this is not received, another [Danger Sign Follow-Up Task](#) is triggered.
